

Amendments to the Specification

IN THE WRITTEN DESCRIPTION

Please replace the paragraph beginning at page 8, line 5, with the following rewritten paragraph:

It is also possible to add, if necessary, to the thermoplastic resin composition of the present invention a non-lead metal or a non-lead metal composition within a range that does not inhibit the effect of the present invention. ~~Example~~Examples of the non-lead metal includes ~~steel~~steel, stainless steel, brass, copper, aluminum, nickel, silver, zinc, or the like. ~~Example~~Examples of the non-lead metal composition includes iron oxide, copper oxide, aluminum oxide, barium sulfate, zinc oxide, molybdenum sulfide, or the like.

Please replace the paragraph beginning at page 9, line 25, with the following rewritten paragraph:

The thermoplastic resin composition of the present invention has excellent moldability and processability because of the use of the thermoplastic elastomer, and it is possible to use various kinds of molding processes including extrusion molding, injection molding and compression molding. Furthermore, the thermoplastic resin composition of the present invention can be recycled. In other words, the present invention has the advantage that the used thermoplastic resin composition of the present invention can be regenerated and reused by being collected, ~~molten~~melted and molded.
